Accessing the BYOD Network with an Apple Device

1. To access the NEISD Network on your Personal Device, tap on Settings on your Apple device.

2. From Settings, tap on WiFi in the left hand column. If your WiFi is turned off you will not see a list of connections until you turn it on. Slide the button to the right until it is green. A list of Wi-Fi connections will appear similar to the graphic.

3. Tap on NEISD WiFi on the right. You will be prompted to enter your Active Directory username and password (do not include @neisd.net).

4. If you have entered your credentials correctly the following pop-up will appear. Tap the Accept Button.
5. You device will begin to scan and obtain an IP address. When you see a check mark beside **NEISD WiFi**, you are ready to proceed. Simply close out of **Settings**.
