Accessing the BYOD Network with an Android Phone

1. To access the NEISD Network on your Personal Device, locate the Settings on your Android device. You can usually access it by swiping down and tapping on the Gear icon on your phone on your Smartphone.

2. From Settings, tap on Wi-Fi under Connections. If your WiFi is turned off you will not see a list of connections until you turn it on. A list of Wi-Fi connections will appear similar to the graphic below.

3. Tap on NEISD WiFi

4. Once tapped, a pop-up will appear. Scroll through the pop-up and tap the space under IDENTITY. Your keyboard should appear and you will need to enter your Active Directory username. (Do not include @neisd.net). Once you have typed in your username, tap on the space directly below ENTER PASSWORD and enter your Active Directory password. Then Click CONNECT.
5. You device will begin to scan and obtain an IP address. When you see the word CONNECTED below NEISD WiFi, you are ready to proceed. Simply close out of the Settings window.
